EXPERIENCE

Full stack developer

Mai. 2024 – Sep. 2024

Royal Canadian Armed forces

Ottawa, ON

- Led a team of **3** developers to build a satellite health tracking platform analyst with **real-time** and past data used by over **10+** analysts.
- Utilized **REST APIs** with a **Spring Boot** Java back-end for data processing and a **React** front-end with **MUI** components to display and interact with the data efficiently.

EDUCATION

University of Ottawa

Ottawa, ON

Bachelor of Computer Engineering, Honours

Sept. 2022 – May 2026

- **GPA:** 3.7
- **Courses:** Data structures and Algorithms, Computer Architecture, Software Development, Electronics, Calculus III, Electricity and Magnetism, Databases

SKILLS

Languages: Java, Python, Javascript, SQL, TypeScript, HTML/CSS

Full-Stack: React, Spring Boot, Next.js, Node.js, RestAPIs, Figma, Tailwind, Firebase

Tools: Android, React Native, Expo, Pandas, Pytorch, Scikit Learn, Tensorflow, Git

PROJECTS

Crop Growth Predictor | *Next.js, Tailwind, Python, Pytorch, Pandas, Scikit-learn, Tensorflow*

- Used a dataset of **20+** crops and their growing conditions to determine the crop with the highest probability of survival
- Tested over **10+** machine learning algorithms with Scikit-learn to determine the best model which was the Naive Bayes algorithm with a success rate of **98%**
- Develop a full stack application using Next.js and used 2 different API's to determine location statistics for the machine learning model

Hotel Booking Application | *Next.js, SQL, Figma, Visual Paradigm*

- Led a **team of 3** in designing and developing a hotel application complete with a Web application and an advanced relational database
- Used Next.js as well as shad.cn and Aceternity to build a beautiful and interactive user interface
- Utilized an efficient SQL relational database

EXTRACURRICULAR

Coding With Mosh Certification | *React, Git*

- Completed **2** comprehensive online courses on React and Git, gaining best-practices and guidelines to build maintainable and robust applications

First Robotics | *CAD design, 3D printing*

- Led a **team of 6** in engineering and designing a precision ball launcher
- Learned skills in CAD and design, enabling proficient creation and visualization of complex 3D models
